

## **Access to Finance / Cashflow Management Business Growth Club:**

### **In partnership with RBS & NatWest**

This is a unique opportunity for you to gain insights in how to **finance** growth in your business in these challenging times. Experienced managers from RBS / NatWest will be personally running these intensive workshops which will help you examine your financial structure, compare notes with both similar and different businesses, and give you free advice on how to get the best sources of finance available to you.

The workshop will also give you time to discuss your thoughts and issues with the bankers and fellow delegates in an atmosphere of sharing best practice.

What will the workshop be covering?

We will be posing a number of thought provoking questions and of course the answers to them. Questions such as;

- Do you use a 'complete financial solution' to free up cash in your business?
- Would you like to know what banks really look for?
- When do you use factoring and is it right for your business?
- Is your business able to use asset finance?
- What tools are available to you to manage your cash better?
- ...And more

Through the shared experience of the small working group and the banker's knowledge within the SME marketplace you will emerge from this workshop with practical financial knowledge, and a better understanding of different financial cashflow strategies, methods and systems you'll instantly be able to take away, personalise and apply to your business.

This is definitely one not to be missed!
